BENITO es heredera de una empresa centenaria de maquinaria de forja y fundición que se ha convertido en líder de la industria de equipamiento urbano global, con presencia en más de 50 países. Controla todas las fases del proceso productivo –diseño, fabricación, distribución y venta– y ofrece cuatro familias de productos, Urban (mobiliario urbano), Light (alumbrado público), Play (parques infantiles y equipamiento deportivo) y Covers (tapas y rejillas). Más de 6.000 referencias, 500 patentes y una filosofía de diseño más accesible y democrático que no renuncia a la calidad y la innovación para adecuar sus productos a las necesidades del mercado y de los usuarios. Desde 2001 BENITO posee la certificación ISO 9001, además de homologaciones específicas y certificaciones de calidad y técnicas para cada producto en diferentes países.

BENITO est l'héritière d'une entreprise centenaire de machinerie de forge et de fonte devenue leader de l'industrie de l'équipement urbain global, présent dans plus de 50 pays. Elle contrôle toutes les phases du processus de production (conception, fabrication, distribution et vente) et offre quatre familles de produits : Urban (meublier urbain), Light (éclairage public), Play (aires de jeux et équipement sportif) et Covers (fonte de voirie). Plus de 6000 références, 500 brevets et une philosophie du design plus accessible et démocratique, qui ne renonce ni à la qualité, ni à l'innovation, afin d'adapter ses produits aux besoins du marché et des usagers. BENITO possède depuis 2001 la certification ISO 9001, en plus d'homologations spécifiques et de certificats de qualité et techniques pour chaque produit dans différents pays.

BENITO is the heir to a Century old machinery casting and forging business that has become a world leader in the urban equipment industry, present in more than 50 countries. It controls every phase of the production process – design, manufacture, distribution and sale – and offers four ranges of products: Urban (street furniture), Light (street lighting), Play (playgrounds and sports equipment) and Covers (covers and grates). More than 6,000 catalogue items, 500 patents and an accessible and democratic design philosophy that upholds a commitment to quality and innovation in adapting its products to market and user needs. BENITO has been ISO 9001 certified since 2001 and holds specific approvals and quality and technical certificates for each of its products in different countries.

BENITO dispone de un Centro Operativo de 60.000m2 que alberga instalaciones de primer nivel, automatizado con los sistemas más avanzados en el ámbito logístico. La filosofía de trabajo se basa en el “lean warehousing”, permitiendo la gestión de operaciones de gran envergadura, ofreciendo servicios inmediatos y plazos de entrega garantizados.

BENITO dispose d'un site opérationnel de 60 000 m2 hébergeant des installations de premier ordre et automatisé avec les systèmes les plus pointus dans le domaine de la logistique. Sa philosophie de travail repose sur le « lean warehousing », ce qui permet la gestion d'opérations de grande envergure, en proposant des services immédiats et des délais de livraison garantis.

BENITO has an Operational centre occupying a surface area of 60,000m2, with first-class facilities and next-generation automated logistics systems. Its work philosophy is based on “lean warehousing”, which makes it possible to manage large-scale operations, provide services immediately and guarantee delivery times.

BENITO ha inaugurado recientemente un nuevo edificio de 1.800 m2 destinado a las oficinas centrales, dónde se centra toda la actividad comercial, financiera y de desarrollo, así como un espacioso showroom de 800m2 con una gran variedad de productos en exposición.

BENITO a récemment inauguré un nouveau bâtiment de 1 800 m2 destiné à son siège central, où se concentre toute l'activité commerciale, financière et de développement, ainsi qu'un espace showroom de 800 m2 pour exposer une grande variété de produits.

Recently, BENITO opened a new building covering 1,800 m2 for use as its head office, in which all the company's sales, financial and development activities will be based, in addition to a spacious 800m2 showroom with a large variety of products on show.

Madera de pino tratada

BENITO utiliza en la mayoría de productos madera laminada de pino tratada en autoclave IV. Este tratamiento le confiere protección frente al ataque de termitas, insectos y hongos de pudrición. Una vez tratada es moldeada y mecanizada en función de las necesidades existentes con herramientas específicas para ello.

La madera es como tal un material respetuoso con el medio ambiente, renovable y sostenible. La madera “respira” es decir, absorbe y desprende la humedad, y es normal que puedan aparecer grietas en la madera que no influyen en su resistencia y durabilidad. Por su parte la propia resina y los nudos de la madera son parte natural de ella.

- Tratada en autoclave, riesgo clase IV, libre de cromo y arsénico, de acuerdo con la norma EN335, consiguiendo una protección resistente al agua y fungicida.
- Adaptado al Standard Europeo, de acuerdo con la norma PRE/227/2003.
- Los postes tienen los bordes redondeados para evitar daños. Se realiza una grieta en medio de cada superficie para facilitar el proceso de secado y evitar cualquier tensión superficial.

Pin traité

BENITO utilise pour la plupart des produits du pin laminé traité en autoclave IV. Ce traitement lui apporte une protection face aux attaques de termites, insectes et champignons de pourriture. Une fois traité, le bois est moulé et usiné en fonction des besoins existants à l'aide d'outils prévus spécialement à cet effet.

Le bois est en lui-même un matériau respectueux de l'environnement, renouvelable et durable. Le bois « respire », autrement dit, il absorbe et restitue l'humidité, et l'apparition de fissures est donc normale ; celles-ci n'influent en rien sur sa résistance et sa durabilité. Par ailleurs, la résine et les nœuds font partie intégrante du bois.

- Traité en autoclave, risque classe IV, sans chrome ni arsenic, conformément à la norme EN335, pour obtenir une protection résistante à l'eau et fongicide.
- Adapté au standard européen, conformément à la norme PRE/227/2003.
- Les poteaux ont les bords arrondis pour éviter tout risque de blessures. Une fente est faite au milieu de chaque surface pour faciliter le processus de séchage et éviter toute tension superficielle.

Treated pine wood

In most of its products, BENITO uses laminated pine wood, treated in a class IV autoclave. This treatment provides protection against termites, insects and wood-decay fungi. Once treated, it is moulded and machined according to the existing needs, using specific tools. Wood, as such, is an environmentally friendly material that is both renewable and sustainable. Wood “breathes”. That means it absorbs and gives off moisture, and it is normal for cracks to appear that have no influence on its strength and durability. The resin and the knots themselves are a natural part of the wood.

- Autoclave-treated, risk class IV, chromium- and arsenic-free, according to standard EN335, providing water-resistant and fungicidal protection.
- Compliant with European Standard PRE/227/2003.
- Posts with rounded edges to prevent injury. A slit is cut in the middle of each surface to facilitate the drying process and prevent any surface tension.

HDPE

El polietileno de alta densidad (HDPE) se caracteriza por su resistencia a los abrasivos químicos y a la corrosión. A su vez ofrece una alta capacidad elástica y ligereza sumada a una alta resistencia a los impactos procurando una robustez excepcional haciendo muy difícil su rotura. Su uniformidad de colores en cantos y laterales le confiere unos acabados continuos y homogéneos. Su base sintética evita el cultivo de bacterias, hongos y líquenes. HDPE es un material 100% reciclable.

HDPE

Le polyéthylène haute densité (HDPE) se caractérise par sa résistance aux abrasifs chimiques et à la corrosion. Sa forte capacité élastique et sa légèreté, alliées à une forte résistance aux impacts, procurent une robustesse exceptionnelle et rendent sa rupture très difficile. L'uniformité de tons entre ses côtés et ses angles assure des finitions continues et homogènes. Sa base synthétique évite la prolifération des bactéries, moisissures et lichens. Le HDPE est un matériau 100 % recyclable.

HDPE

High Density Polyethylene (HDPE) is characterised by its resistance to harsh chemicals and corrosion. It also provides a high elastic capacity and a light weight, which together with great impact resistance, make it very sturdy and difficult to break. Its uniformity of colours on edges and sides provides continuous and homogeneous finishes. Its synthetic base prevents the growth of bacteria, fungi and lichens. HDPE is a 100% recyclable material.

HDPE producido con material reciclado

ECOPLAY - Material 100% ecológico de gran durabilidad. Como novedad, en nuestros productos aplicamos paneles “ECOplay”. Són paneles de HDPE pero no solamente reciclable tras su uso, sino también producido con material reciclado.

HDPE produit à partir de matériaux recyclés

ECOPLAY est un nouveau matériau 100% écologique, très résistant et d'une grande durabilité. ECOPLAY a été développé conjointement par nos fournisseurs et est fabriqué à partir de matériaux recyclés ; il est lui-même 100 % recyclable. ECOPLAY représente un pari pour la durabilité, et c'est pour cela que BENITO l'emploie de plus en plus dans de nouveaux produits.

HDPE produced from recycled material

“ECOPLAY is a new 100% eco-friendly material with great durability and resistance. ECOPLAY has been developed in collaboration with our suppliers and is manufactured from recycled materials; it, in turn, is also 100% recyclable. ECOPLAY is a solid step towards sustainability, and that is why BENITO uses it more and more often in its new products.

HPL

El material HPL se utiliza generalmente para paneles lisos en laterales de juegos y cartería. Es un tablero compacto fenólico decorativo diseñado para su utilización en condiciones climáticas severas donde el sol, el viento, la lluvia, la humedad, los hongos o la contaminación, atacan a todo tipo de materiales. Es un material laminado de alta presión para exterior. Se fabrica de forma precisa bajo estrictas normas regladas utilizando los materiales necesarios para alcanzar la máxima calidad. El núcleo está compuesto en su totalidad por pulpa de madera y resinas fenólicas. La melamina exterior se fabrica para que sea capaz de resistir la acción de los rayos ultravioleta y los agentes medioambientales procurando así un desgaste mínimo con el paso del tiempo.

HPL

Le matériau HPL est généralement utilisé pour les panneaux lisses sur les côtés de jeux et pour les panneaux. Il s'agit d'un panneau compact phénolique décoratif, conçu pour être utilisé dans des conditions climatiques sévères, où le soleil, le vent, la pluie, l'humidité, les champignons ou la pollution attaquent tout type de matériaux. Il s'agit d'un matériau stratifié à haute pression pour extérieur. Il est fabriqué selon un modèle précis, suivant des normes strictes, en utilisant les matériaux nécessaires pour atteindre une qualité optimale. Son noyau est entièrement composé de pâte de bois et de résines phénoliques. La mélamine extérieure est conçue pour pouvoir résister à l'action des rayons ultraviolets et des agents environnementaux, ce qui diminue considérablement l'usure due au temps.

HPL

HPL material is generally used for smooth panels on the sides of playground equipment and signs. It is a compact, decorative phenolic board designed for use in extreme weather conditions in which the sun, wind, rain, humidity, fungi and pollution adversely affect all kinds of materials. It is a compact material, laminated at high pressure for outdoor use. It is manufactured using precise methods and according to strict regulations, employing materials that ensure maximum quality. The core is made up entirely of wood pulp and phenolic resins. The outer melamine layer is manufactured to withstand the action of ultraviolet radiation and environmental agents, thus ensuring minimal wear over time.

Contrachapado fenólico

Tableros contrachapados fenólicos de abedul 100% con caras recubiertas con film antideslizante de alta calidad. Ligero pero a la vez resistente. El contrachapado fenólico posee mejor inmunidad a la humedad comparado con otros tableros derivados de la madera.

Contre-plaqué phénolique

Panneaux de contre-plaqué phénolique de bouleau 100 % aux faces recouvertes de film antidérapant d'une grande qualité. À la fois léger et résistant. Le contre-plaqué phénolique présente une meilleure résistance à l'eau que d'autres panneaux dérivés du bois.

Phenolic plywood

Phenolic plywood boards made from 100% birch wood with surfaces lined with high-quality slip-resistant film. It is lightweight, yet resistant. Phenolic plywood has greater immunity to moisture than other wood-derivative boards.

LDPE, polietileno de baja densidad rotomoldeado

El polietileno de baja densidad (LDPE) se caracteriza por su resistencia a los abrasivos químicos y a la corrosión. A su vez ofrece una alta capacidad elástica y ligereza sumada a una buena resistencia a los impactos procurando una robustez excepcional haciendo muy difícil su rotura. Su uniformidad de colores en cantos y laterales confiere unos acabados continuos y homogéneos. Su base sintética evita el cultivo de bacterias, hongos y líquenes. LDPE es un material 100% reciclable.

LDPE, polyéthylène rotomoulé à faible densité

Le polyéthylène à faible densité (HDPE) se caractérise par sa résistance aux abrasifs chimiques et à la corrosion. Sa forte capacité élastique et sa légèreté, alliées à une forte résistance aux impacts, procurent une robustesse exceptionnelle et rendent sa rupture très difficile. L'uniformité de tons entre ses côtés et ses angles assure des finitions continues et homogènes. Sa base synthétique évite la prolifération des bactéries, moisissures et lichens. Le LDPE est un matériau 100% recyclable.

Rotomoulded low density polyethylene (LDPE)

Low Density Polythene (LDPE) is characterised by its resistance to harsh chemicals and corrosion. It also provides a high elastic capacity and is lightweight, which together with good impact resistance, make it very sturdy and difficult to break. Its uniformity of colours on the edges and sides allow for continuous and homogeneous finishes. Its synthetic base prevents the growth of bacteria, fungi and lichens. LDPE is a 100% recyclable material.

Componentes | Composants | Components

Componentes de plástico

Mangos: Polipropileno moldeado por inyección
Tapas protectoras para postes: HDPE inyectado, de 90x90mm, textura mate con tornillo de fijación central cubierto con un tapón inmóvil
Tapas de plástico para tornillos de compresión: mezcla de PEAD y PEBD inyectado, con un diámetro de 34mm. Como la madera es un elemento vivo que se expande y se contrae, estas tapas no se mueven y se ajustan a los tornillos.

Composants en plastique

Poignées : Polypropylène moulé par injection
Capuchons de protection pour poteaux: PEHD injecté, 90x90 mm, texture mate avec vis de fixation centrale couverte par un capuchon inamovible.
Capuchons en plastique pour vis de compression : Mélange de PEAD et PEBD injecté, de 34 mm de diamètre. Comme le bois est un élément vivant qui se dilate et se contracte, ces capuchons ne bougent pas et s'ajustent aux vis.

Plastic components

Handles: Injection moulded polypropylene
Protective post covers: 90 × 90 mm injected HDPE with a matte texture and centre fastening screw fitted with a non-removable cap.
Plastic caps for compression screws: Combination of injected HDPE and LDPE, with a diameter of 34 mm. Wood is a living element that expands and contracts, but these caps remain in place, fastened to the screws.

Cuerdas y cables

Cuerda: Multifilamento trenzado, recubierto de Polipropileno y con nervios metálicos de alta resistencia.

Cable de acero galvanizado: Consiste en varios cables metálicos, colocados de forma helicoidal alrededor de un núcleo. Sección de 10mm.

Cordes et câbles

Corde : Multifilament tressé, revêtu de polypropylène, avec des nervures métalliques haute résistance.

Câble en acier galvanisé : Constitué de plusieurs câbles métalliques, disposés en hélice autour d'un noyau. Section de 10 mm.

Ropes and cables

Rope: Braided multifilament rope with a polypropylene jacket and heavy-duty metal ribs.

Galvanised steel cable: Consisting of several metal cables arranged in a spiral around a core. 10-mm cross-section.

Muelles

Acero con un tratamiento de cataforesis y lacado en polvo.
Dispositivo anti pellizcos - una pieza perfectamente ajustada y colocada en la parte superior del muelle, garantiza su posición perpendicular y evita pellizcos.
Tornillería de acero inoxidable: usada para anclar los muelles en el suelo.

Ressorts

Acier, avec un traitement de cataphorèse et laqué à la poudre.
Système anti-pincement - une pièce parfaitement ajustée et posée sur la partie supérieure du ressort assure sa position perpendiculaire et évite les pincements.
Visserie en acier inoxydable : employée pour ancrer les ressorts dans le sol.

Springs

Steel, with a cathaphoretic and powder lacquer finish.
Anti-pinch device - one part fits perfectly on top of the spring, ensuring its perpendicular position and preventing pinching.
Stainless steel fasteners: used to anchor the springs to the ground.

Componentes metálicos

Aluminio anodizado: alta resistencia a los agentes meteorológicos, agentes corrosivos y abrasivos y al desgaste. Proporciona una alta dureza superficial gracias a su adherencia y sus propiedades de anodización.
Utilizado en abrazaderas, conectores redes.

Composants métalliques

Aluminium anodisé: haute résistance aux agents atmosphériques, aux agents corrosifs et abrasifs et à l'usure. Il offre une grande dureté superficielle grâce à son adhérence et à ses propriétés d'anodisation.
Utilisé pour les colliers et les connecteurs réseaux.

Metallic components

Anodised aluminium: highly resistant to weather, corrosive and abrasive agents and wear. Provides high surface hardness thanks to its adherence and anodising properties.
Used on clamps, connectors and nets.

Acero Inoxidable

El acero inoxidable es un acero de elevada resistencia a la corrosión. Es un material noble e higiénico y no es un revestimiento, esto hace que las cualidades del material sean invariables en el tiempo. Gracias a su composición no permite que la suciedad y los agentes externos como el polvo y las bacterias se adhieran a su superficie ofreciendo siempre un aspecto limpio y brillante. Su ausencia de porosidad lo hace fácil de mantener y limpiar.

Acier inoxydable

L'acier inoxydable est un acier présentant une forte résistance à la corrosion. Ce matériau noble et hygiénique n'est pas un revêtement, ce qui fait qu'il conserve ses propriétés dans le temps. Sa composition empêche les impuretés et les agents externes tels que la poussière et les bactéries de se fixer à sa surface, ce qui lui permet de maintenir en permanence un aspect propre et brillant. L'absence de porosité le rend simple à entretenir et à nettoyer.

Stainless Steel

Stainless steel is highly resistant to corrosion. It is a noble, hygienic material and not merely a lining, which makes its qualities invariable over time. Its composition does not allow dirt or other external agents, such as dust and bacteria, to stick to its surface, thus providing a permanently clean and shiny appearance. Its lack of porosity makes it easy to maintain and clean.

Acero galvanizado

El galvanizado es un tratamiento electro químico que se puede aplicar a diferentes metales para dotarle de alta resistencia contra la oxidación. Se realiza mediante inmersión de las piezas en una bañera de Zinc a 450°C. El recubrimiento de zinc se adhiere químicamente a la base del acero por una reacción química metalúrgica formando una capa de aleación más dura que el acero que impide que las partes estructurales se debiliten por causas ambientales como son la humedad, la corrosión o las atmósferas contaminantes. A la vez, para darle una protección adicional y un mejor aspecto visual se aplica un acabado con pintura de poliéster polimerizada al horno a 200°.

Acier galvanisé

La galvanisation est un traitement électrochimique applicable à divers métaux afin de les rendre plus résistants à l'oxydation. Il est effectué en immergeant les pièces dans un bain de zinc à 450 °C. Le recouvrement de zinc adhère chimiquement à la base de l'acier grâce à une réaction chimique métallurgique et forme une couche d'alliage plus dure que l'acier, qui empêche les parties structurelles d'être affaiblies par des aspects environnementaux tels que l'humidité, la corrosion ou les atmosphères polluantes. D'autre part, une finition à la peinture de polyester polymérisé au four à 200 ° lui est appliquée afin d'optimiser sa protection et son aspect visuel.

Galvanised Steel

Galvanisation is an electrochemical treatment that can be applied to different metals to give them high rust resistance. It is applied by immersing parts in a zinc bath at 450 °C. The zinc coating chemically adheres to the steel base through a chemical metallurgic reaction, forming an alloy layer that is harder than steel, which prevents the structural parts from weakening due to environmental causes, such as humidity, corrosion or atmospheric pollutants. For additional protection and a more attractive appearance, a polyester paint finish is applied, oven-polymerised at 200 °C.

Innovación, calidad, seguridad.
Innovation, qualité, sécurité.
Innovation, quality and safety.

La gama de Parques Infantiles ofrece multitud de juegos diferentes y conjuntos modulares de fácil combinación que permiten crear espacios únicos, cuyo objetivo es desarrollar las capacidades sociales, individuales, cognitivas y motrices de los más pequeños. Los juegos son atractivos, divertidos, didácticos y despiertan el interés y la curiosidad de niños y mayores.

La fabricación de parques infantiles exige un compromiso no sólo con el medio ambiente, sino también con la calidad del producto final. Buscamos una mejora continua basada en un desarrollo sostenible, utilizando materiales respetuosos, siendo a la vez respetuosos con la salud infantil.

La gamme Aires de Jeux offre une multitude de jeux différents et d'ensembles modulaires de combinaison facile qui permettent de créer des espaces uniques, dont l'objectif est de développer les capacités sociales, cognitives et motrices des plus petits. Les jeux sont attractifs, amusants, didactiques, ils réveillent l'intérêt et la curiosité des enfants et des plus grands.

La fabrication de parcs pour enfants demande un compromis non seulement avec l'environnement mais aussi avec la qualité du produit final. Nous sommes en amélioration continue en nous basant sur un développement durable, en utilisant des matériaux respectueux y compris pour la santé des enfants.

The Playground Equipment range features a wealth of different, easy to combine, play equipment and modular sets that make it possible to create unique spaces with the aim of develop children's social, individual, cognitive and motor skills. The play equipment is attractive, fun, educational and awakens the interest and curiosity of both children and adults.

The manufacturing process of playground equipment demands a full commitment not only with environment, but also with the quality of the finished product. We are in constant search of excellence & improvement based on a sustainable development by using environmentally friendly materials and being respectful to children at the same time.

Seguridad y control de calidad

Nuestro objetivo es la diversión de pequeños y mayores con toda la seguridad. Por este motivo, todos nuestros juegos están certificados por el TÜV Product Service según la normativa Europea UNE EN 1176-2008. Por lo tanto, toda nuestra gama de parques infantiles cumplen estrictamente los parámetros y exigencias que indica la normativa vigente actual.

Todos los productos de BENITO son construidos para durar y son fabricados con los mejores materiales disponibles para las zonas de juego. Su alta calidad, resistencia y bajo mantenimiento los convierten en únicos y garantizan una larga vida del juego.

Cada juego es instalado según el área de seguridad que ha de cumplir y que se especifica en la ficha técnica. Nuestras instalaciones son realizadas por profesionales homologados y certificados por BENITO siguiendo estrictamente las instrucciones de montaje.

Sécurité et contrôle de qualité

Notre objectif est d'amuser les petits et les grands en toute sécurité. Pour cela, tous nos jeux sont certifiés par la TÜV selon la norme Européenne UNE EN 1176-2008. Par conséquent, toute notre gamme d'aires de jeux est conforme à l'ensemble des normes actuellement en vigueur.

Tous les produits BENITO sont conçus pour durer et sont fabriqués avec les meilleurs matériaux disponibles pour les aires de jeux. Leur grande qualité, leur résistance et leur entretien facile les rendent uniques et garantissent une grande longévité au jeu.

Chaque jeu est installé en respectant une zone de sécurité spécifiée dans la fiche technique. Nos installations sont réalisées par des professionnels homologués et certifiés par BENITO qui suivent strictement les instructions de montage.

Safety and quality control

Our goal is fun for young and old in complete safety. This is why all our play equipment is certified by TÜV Product Service in accordance with the European UNE EN 1176-2008 standard. This means that our whole range of children's play equipment complies strictly with the specifications and demands set by current regulations.

All BENITO products are built to last and made from the best materials available for playgrounds. Their high quality, toughness and low maintenance make them unique and guarantee a long life for play equipment.

Every piece of equipment is installed with the necessary safety area around it as specified in the technical data sheet. Our installations are carried out by qualified professionals approved by BENITO and are strictly in accordance with the installation instructions.

By Mariscal

Mariscal es el creador español más reconocido en todo el mundo. Ha transitado siempre por la frontera que separa el arte del diseño y tiene rara habilidad de gustar por igual a grandes y pequeños. No podíamos encontrar un personaje más adecuado para desarrollar una nueva serie de juegos infantiles con un marcado sello de autor.

Las dos primeras piezas de esta colección, que se ampliará en el futuro, son un columpio y un muelle que reproducen algunos de sus personajes más conocidos, como Piker y Julián, además de su pasión por los vehículos de transporte.

Una pincelada colorista de arte lúdico para parques y jardines, tanto públicos como privados.

Mariscal est le créateur espagnol le plus renommé dans le monde entier. Franchissant depuis toujours la frontière qui sépare l'art du design, il a la particularité de plaire aussi bien rare, aux grands qu'aux petits. Il est sans aucun doute la personne idéale pour développer une nouvelle série de jeux pour enfants dans un style personnel fortement marqué.

Les deux premières pièces de cette collection, qui sera plus tard élargie, consistent en une balançoire et un ressort reproduisant certains de ses personnages les plus célèbres, tels que Piker et Julián, en plus de sa passion pour les véhicules de transport. Une touche colorée d'art ludique pour parcs et jardins, aussi bien publics que privés.

Mariscal is Spain's best-known designer in the world. He has long worked on the borderline between art and design and has the rare gift of being popular with grown-ups and children alike.

We couldn't have found anyone better to develop a new series of signature playground equipment. The first two pieces in this collection, which will be expanded on in the future, are a swing and a spring rider featuring some of his most famous characters, such as Piker and Julián, as well as his passion for transport vehicles.

A colourful touch of fun art for public or private parks and gardens.

Equipamiento deportivo para un estilo de vida saludable

En BENITO apostamos por el deporte y un estilo de vida saludable. Por este motivo, ofrecemos una amplia gama de productos para favorecer la práctica de deportes al aire libre en el tiempo de ocio. Los productos diseñados de equipamiento deportivo favorecen la realización de actividad físico-deportiva en el espacio público, de una forma coherente y respetuosa con el medio, así como la creación de un hábito lúdico-deportivo al alcance de cualquier ciudadano.

Nuestro objetivo es el bienestar de los ciudadanos, desde los más pequeños hasta los más mayores. En BENITO ponemos al alcance de todos una gran variedad de equipamiento deportivo que permiten realizar actividad física de una forma divertida, agradable y cómoda.

Équipement sportif pour un style de vie sain

Chez BENITO, nous misons sur le sport et un style de vie sain. C'est pourquoi nous vous offrons une large gamme de produits afin de favoriser la pratique du sport en plein air pendant votre temps libre. Les produits conçus comme équipement sportif favorisent les activités physico-sportives dans l'espace public, d'une manière cohérente et respectueuse de l'environnement, ainsi que la création d'une habitude ludique et sportive à la portée de tous.

Notre but est le bien-être de tout un chacun, des plus jeunes aux plus âgés. Chez BENITO, nous mettons à la portée de tous une grande variété de matériel sportif qui permet de pratiquer une activité physique en s'amusant, d'une manière agréable et confortable.

Sports equipment for a healthy lifestyle

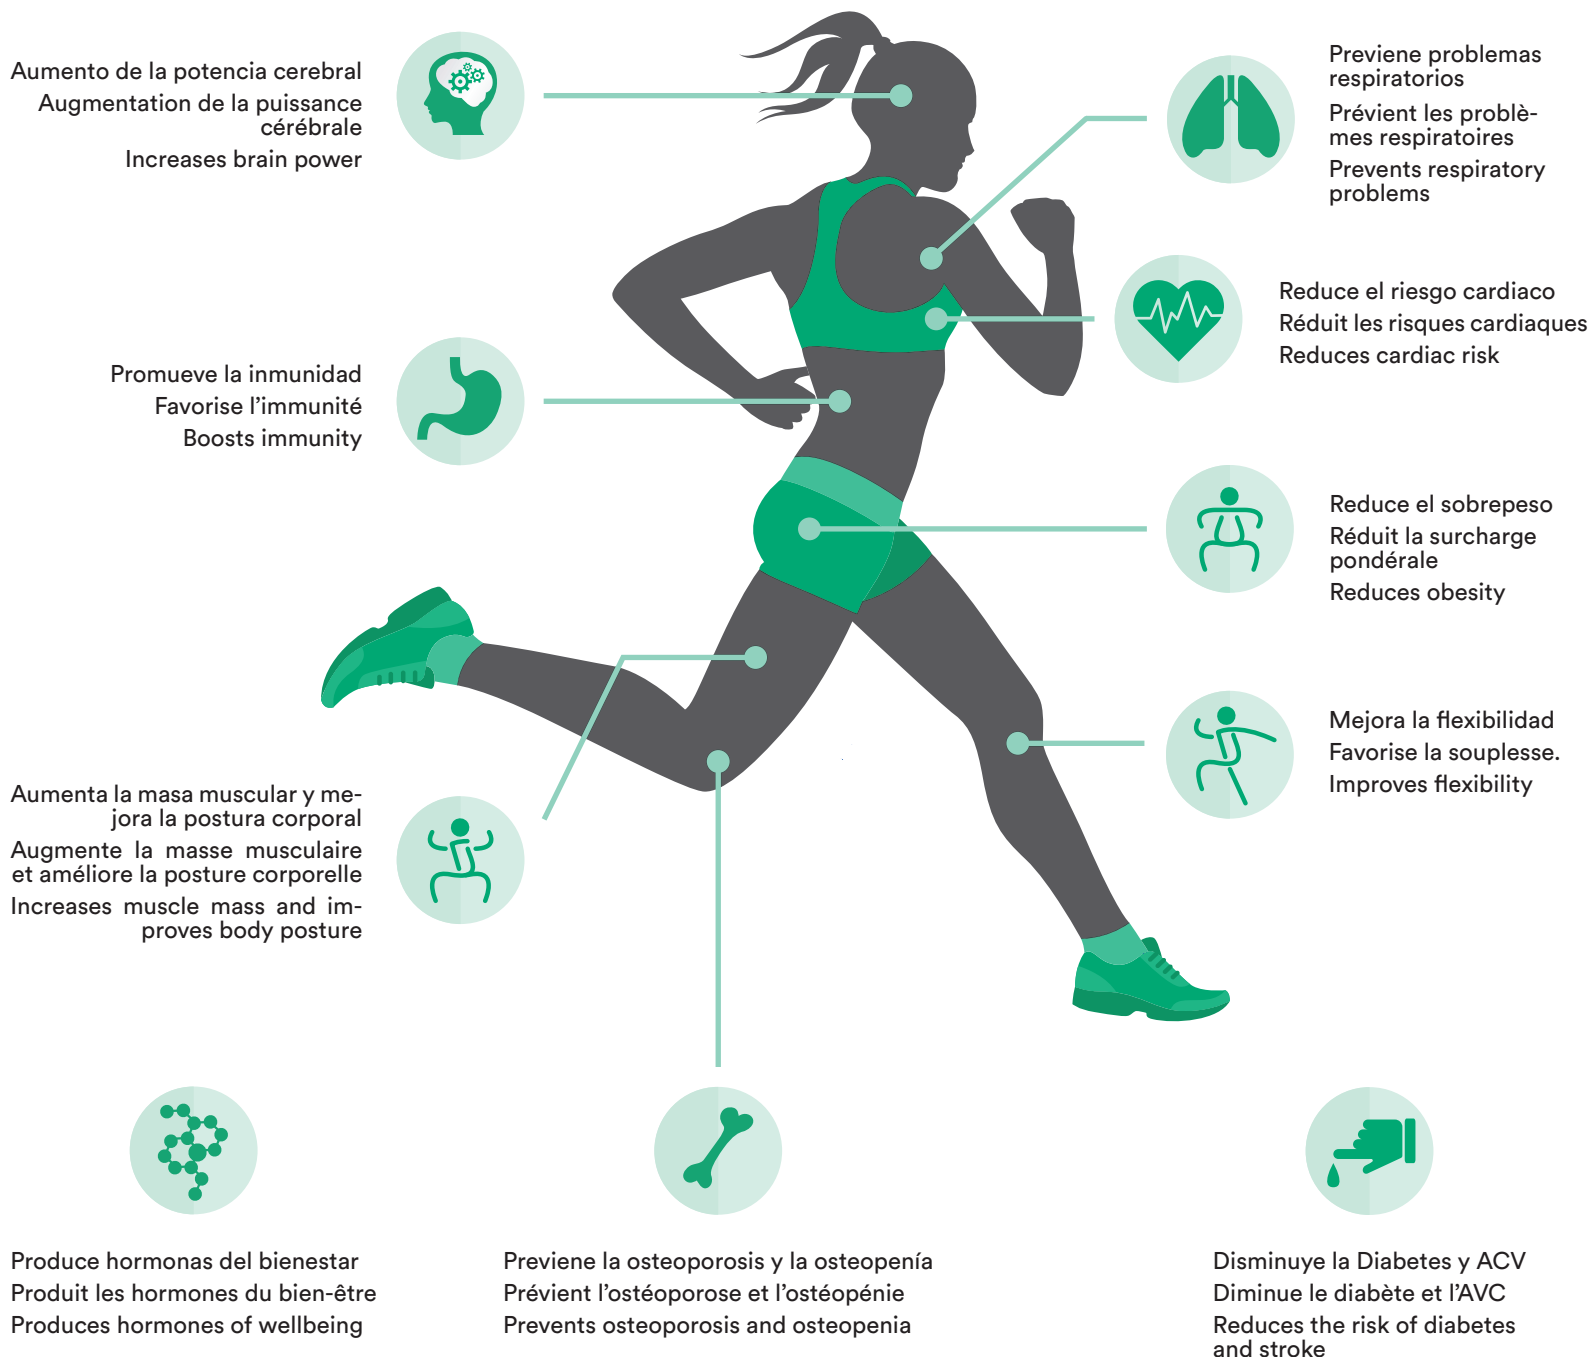

At BENITO, we are committed to sports and a healthy lifestyle. For this reason, we offer a wide range of products to encourage people to take part in outdoor sports during their leisure time. Products designed for sports promote physical exercise and sport in public spaces, in a coherent and environmentally-friendly way, in addition to creating sports and leisure habits for everyone.

Our goal is the well-being of all citizens, both young and old. At BENITO, we make a wide variety of sports equipment available to everyone, allowing them to engage in physical activities in a pleasant, convenient and fun way.

Circuitos deportivos Work-fit

Los elementos Work-fit nos permiten diseñar multitud de circuitos deportivos dependiendo del tipo de ejercicio o actividad deportiva que se quiera ejercer.

La gama Work-fit es completa y todos los elementos se pueden combinar perfectamente para lograr un circuito a medida en función de los objetivos por los cuales ha sido diseñado.

Los elementos Work-fit se instalan normalmente en zonas al aire libre dibujando un circuito de andar o correr en grandes parques o avenidas y zonas verdes.

Work-fit nos permite combinar de manera perfecta el andar o el correr con ejercicios diversos para mantener una vida sana y saludable. Work-fit se fabrica íntegramente en madera y por este motivo es recomendable instalar en entornos naturales.

Parcours sportifs Work-fit

Les éléments Work-fit permettent de concevoir une multitude de parcours sportifs selon le type d'exercice ou d'activité sportive que vous avez choisi.

La gamme Work-fit est complète et tous les éléments se combinent parfaitement pour obtenir un parcours sur mesure, en fonction des objectifs pour lesquels il a été conçu.

Les éléments Work-fit s'installent généralement dans des zones de plein air, en traçant un parcours pour marcher ou courir dans de grands parcs, des avenues et des zones vertes.

Work-fit vous permet de combiner parfaitement la marche ou la course avec des exercices variés, afin de garder un style de vie sain. Work-fit est intégralement fabriqué en bois et est par conséquent recommandé dans des environnements naturels.

Work-fit sport circuits

The Work-fit equipment allows you to design different sport circuits, depending on the type of exercise or sport activity you want to do.

The Work-fit range is complete and all its parts can be perfectly combined to create a customised circuit according to the purposes for which it has been designed.

The Work-fit elements are normally installed in outdoor areas, tracing a walking or running circuit in large parks, avenues or green areas.

Work-fit allows you to combine walking or running with different exercises to maintain an active, healthy lifestyle. Work-fit is manufactured entirely from wood, which make it recommendable for installation in natural environments.

Work-fit Pro

EN16630:2015

Outdoor Sport

BENITO diseña y fabrica espacios deportivos y de ocio para hacer ejercicio y disfrutar al aire libre sin limitaciones.

Work-fit PRO es un producto profesional dirigido a personas que quieren realizar un ejercicio intensivo para fortalecer cuerpo y mente.

Cada uno de los modelos diseñados contiene varios elementos para poder realizar ejercicios diversos y completos con el fin de desarrollar una completa forma física.

Work-fit PRO se fabrica a partir de acero galvanizado acabado en pintura de poliéster en polvo.

Outdoor Sport

BENITO conçoit et fabrique des espaces de sports et de loisirs pour faire des exercices et profiter du plein air, sans limites.

Work-fit PRO est un produit professionnel conçu pour tous ceux qui recherchent un exercice physique intense afin de fortifier le corps et l'esprit.

Chacun des modèles conçus contient plusieurs éléments qui permettent de faire des exercices variés et complets, afin de développer une forme physique optimale.

Work-fit PRO est fabriqué à partir d'acier galvanisé, avec une finition en peinture de polyester en poudre.

Outdoor Sport

BENITO designs and manufactures sports and leisure areas for exercising and enjoying the outdoors without limitations.

Work-fit PRO is a professional product intended for people who want to do intensive exercise to strengthen their mind and body.

Each of its models includes several elements for different comprehensive exercises to provide complete physical fitness.

Work-fit PRO is made from galvanised steel with a polyester powder coated finish.

Rampas Skate | Rampes Skate | Skate Ramps

Insonoros, requieren un mantenimiento mínimo y se pueden ampliar, reparar o cambiar de lugar sin desmontarlos totalmente.

Insonores, ils demandent un entretien minimal et peuvent être agrandis, réparés ou déplacés sans être entièrement démontés.

Soundless, they require minimal maintenance and can be extended, repaired or moved without the need to completely disassemble them.

Perforaciones de transpiración y eje central para un exacto encaje.

Perforations de transpiration et axe central pour un ancrage précis.

Ventilation holes and central shaft for an exact fit.

SPEED BASE

Fibra de vidrio especial del 9mm de espesor laminado a mano, alta densidad color azul RAL 5002 mate.

100% resistente a los rayos UVA, al hielo y a los impactos. La superficie tiene una gran solidez, sin riesgo de deformación, ni hundimiento en el asfalto. Estructura ligera. Conjunto de gran durabilidad, debido a su construcción modular.

La superficie speed base es una de las más insonorizadas del mercado.

Tubos de acero laminado al horno
Tubes d'acier laminé au four
Solid oven-laminated steel pipes

El elemento se sustenta por unos pies de láminas de metal, ajustables para nivelarse al suelo.

L'élément est soutenu par plusieurs pieds faits de plaques de métal, réglables pour s'adapter au sol.

The element is supported by sheet metal feet, which can be adjusted to level it with the ground.

SPEED BASE

Fibre de verre spéciale de 9 mm d'épaisseur laminée à la main, haute densité de couleur bleue RAL 5002 mat.

100 % résistant aux rayons UV, au gel et aux impacts La surface est très solide et ne présente aucun risque de déformation ou d'enfoncement dans le goudron. Structure légère. Ensemble très durable grâce à sa construction modulaire.

La surface speed base est une des mieux insonorisées du marché.

SPEED BASE

Special 9-mm thick high-density hand-laminated fibreglass in RAL 5002 ultramarine blue with a matte finish.

100% resistant to UVA radiation, ice and impact. Extremely solid surface with no risk of deformation or sinking into the asphalt. Lightweight structure. Its modular construction makes the set very durable.

The speed base surface is one of the most soundproof on the market.

Césped | Gazon | Turf

La gama de césped artificial BENITO tiene un aspecto natural sorprendente. Está diseñada para uso en pistas de Pádel y Multideporte. Su durabilidad, resistencia y planimetría está contrastada a prueba de un uso intensivo.

El césped artificial BENITO ofrece alta rentabilidad de las instalaciones, un mínimo mantenimiento y minimiza el riesgo de posibles lesiones en los deportistas.

El césped se instala sobre aglomerado asfáltico u hormigón poroso. El extendido y unión de la fibra se hace mediante cola de poliuretano. Marcaje de líneas de juego del mismo material.

El material se fabrica de acuerdo con los requisitos previstos por la norma UNE EN ISO 9001:2000 en cuanto a diseño, fabricación y trazabilidad en empresas que poseen la certificación del sistema de calidad otorgada por organismos reconocidos.

La gamme de pelouse artificielle de BENITO présente un aspect naturel surprenant. Elle est conçue pour une utilisation sur des courts de paddle et des terrains multisports. Sa durabilité, sa résistance et sa planimétrie supportent une utilisation intensive.

La pelouse artificielle BENITO permet une grande rentabilité des installations, demande très peu d'entretien et réduit le risque de blessures pour les sportifs.

La pelouse s'installe sur des agglomérés asphaltiques ou sur du béton poreux. L'étendage et l'union de la fibre sont effectués à l'aide de colle de polyuréthane. Marquage de lignes de jeu du même matériau.

Le matériau est fabriqué conformément aux critères de la norme UNE EN ISO 9001:2000 concernant le design, la fabrication et la traçabilité dans les entreprises ayant reçu la certification du système de qualité attribuée par des organismes reconnus.

The BENITO artificial turf range has a surprisingly natural appearance. It is designed for use on paddle and multi-purpose sports courts. Its durability, resistance and planimetry have been proven to be suitable for intensive use.

BENITO artificial turf offers high profitability for the facilities, with minimal maintenance; it also reduces the risk of injury for athletes.

The turf is installed on top of an asphalt mix aggregate or porous concrete. The fibre is laid and joined using a polyurethane adhesive. The boundary lines for the game are made from the same material.

The material is manufactured according to the requirements set out in standard UNE EN ISO 9001:2000 with regard to the design, manufacture and traceability in companies holding quality system certification granted by recognised bodies.

Deporte revolución en las calles

Diseñada por y para amantes del fútbol

FUTTOC - Como el tenis de mesa, pero sin palas; como el vóleybol, pero sin manos; como el fútbol, pero sin porterías. Pie, pecho, cabeza, rodilla; todo vale, incluso subirse a la mesa, al terreno de juego, suspendido a unos 70 centímetros del suelo. Estamos hablando de un deporte dinámico, divertido y que permite, a su vez, que los jugadores de fútbol puedan mejorar su técnica.

El Futtoc usa una mesa ovalada muy similar a la de ping-pong y los jugadores, por encima de la red, han de hacer pasar una pelota de fútbol fabricada con un material más ligero. Se puede jugar individualmente o en parejas, se rige por unas reglas muy parecidas a las del tenis de mesa -en cuanto a la puntuación y el saque- y la pelota se puede pasar al campo contrario con cualquier parte del cuerpo, excepto con las manos, como en el fútbol.

Los participantes, además, pueden subir encima de la mesa para rematar con mayor determinación. Todo ello hace que el Futtoc sea un deporte “muy divertido, explosivo y apto para todas las edades”.

Révolution du sport dans les rues

Conçue pour les amoureux du football

FUTTOC - Comme le tennis de table, mais sans raquettes, comme le volleyball, mais sans les mains, comme le football, mais sans cages. Pied, poitrine, tête, genou, tout est permis, y compris monter sur la table, le terrain de jeu, suspendu à environ 70 centimètres du sol. Il s'agit d'un sport dynamique, amusant et qui permet en même temps aux joueurs de football d'améliorer leur technique.

Le Futtoc est une table ovale très proche de celle du ping-pong, et les joueurs doivent faire passer par-dessus le filet un ballon de football fabriqué dans un matériau très léger. On peut y jouer seul ou à deux; les règles sont très proches de celles du tennis de table (concernant le comptage des points et le service) et le ballon peut être envoyé dans le camp adverse à l'aide de n'importe quelle partie du corps, sauf les mains, comme au football.

Les joueurs peuvent également monter sur la table afin de renforcer leur tir. Tout ceci fait du Futtoc un sport “très amusant, explosif et adapté à tous les âges”.

Revolutionary street sport

Designed by and for football lovers

FUTTOC - Like table tennis, but without paddles; like volleyball, but with no hands; like football, but without goal posts. Feet, chest, head, knees; anything goes, even climbing up on the table to the playing field, suspended 70 cm above ground. We're talking about a fun, dynamic sport that allows football players to improve their technique.

Futtoc uses an oval-shaped table very similar to a ping-pong table, and the players must pass a football made from a lighter material over the net. It can be played by single-player teams or in pairs. The rules are very similar to those of table tennis in terms of scoring and serving, and the ball can be passed to the opposite field with any part of the body, except the hands, just like in football.

The participants can also climb up on the table to return the ball with even greater determination. All this makes Futtoc a “very entertaining, explosive sport suitable for all ages”.

Solución de invierno y verano

Especialmente indicado para cubrir espacios de manera elegante

Estructuras tensadas perfectas para cubrir total o parcialmente todo tipo de espacios abiertos como parques infantiles, plazas públicas, escenarios, eventos, aparcamientos, zonas de ocio, instalaciones deportivas, centros comerciales, bares, hoteles, cámpings etc.

Solution d'hiver et d'été

Spécialement indiqué pour couvrir les espaces de manière élégante

Structures tendues, parfaites pour couvrir totalement ou partiellement tout type d'espace ouvert comme les parcs pour enfants, places publiques, scènes, événements, parkings, zones de loisirs, installations sportives, centres commerciaux, bars, hôtels, campings, etc.

A solution for both winter and summer

Specially designed to cover spaces in an elegant way

Perfectly tightened structures that totally or partially cover all types of open air spaces such as playground areas, public squares, performance stages, events, parking lots, sport facilities, malls, bars, hotels, camping sites, etc.

PAVIMENTOS DE CAUCHO A MEDIDA

La mejor protección para jugar con **SEGURIDAD**

El caucho continuo se aplica directamente en el lugar donde debe ser instalado. Es ideal para aplicarlo en zonas de juegos infantiles, colegios, guarderías, zonas deportivas, residencias de ancianos y en general en cualquier zona propensa a la caída de personas tanto para aplicaciones de interior como de exterior.

REVÊTEMENTS DE CAOUTCHOUC SUR MESURE

La meilleure protection pour jouer en tout **SÉCURITÉ**

Le caoutchouc continu s'applique directement à l'endroit où il doit être installé. Il est idéal pour les zones de jeux pour enfants, les collèges, les garderies, les zones sportives, les résidences du troisième âge et en général, pour toute zone où il existe un risque de chute, aussi bien en intérieur qu'en extérieur.

CUSTOM RUBBER FLOOR SURFACES

The best protection to play **SAFELY**

Continuous rubber flooring is applied directly on site. It is suitable for playground areas, schools, kindergartens, sport areas, retirement homes and generally any other places (both indoor and outdoor) where people can fall off.

El pavimento de caucho continuo reciclado BENITO destaca por su acabado sin juntas, su resistencia, su carácter permeable, su fácil instalación y su mínimo mantenimiento. La inexistencia de juntas y la variedad de colores vivos permiten la realización de infinitos diseños con dibujos y motivos personalizados.

La garantía de los pavimentos de caucho continuo es de 2 años contra defectos de fabricación.

Se aplica directamente en el lugar donde debe ser instalado. Primeramente se realiza una capa base de granulados de caucho negro seleccionado (SBR) ligados con poliuretano. Posteriormente se aplica una capa superior de granulados EPDM, en distintos colores.

Le revêtement en caoutchouc continu recyclé BENITO se distingue par sa finition sans joints, sa résistance, sa perméabilité, sa facilité d'installation et son entretien minimal. L'absence de joints ainsi que la variété de couleurs vives permettent de créer une infinité de designs et de motifs personnalisés.

Les revêtements de caoutchouc sont garantis deux ans en cas de défaut de fabrication.

Le sol coulé «in situ» est appliqué directement sur le site. Il comprend une première couche de base en granules de caoutchouc noir (SBR) avec un liant polyuréthane. Puis une couche supérieure de granulés d'EPDM de couleurs

BENITO's recycled continuous rubber flooring stands out for its seamless finish, resistance, permeable characteristics, ease of installation and minimal maintenance requirements. The lack of seams and the variety of bright colours make it possible to create an infinite number of designs with personalised patterns.

Our continuous rubber flooring has a 2-year warranty against manufacturing defects.

The continuous rubber is directly applied to the specific site area. First, a selected granular black rubber layer (SBR) glued with polyurethane is placed all over the place, then, a top EPDM granular layer in different colours is applied.

Recycled Rubber

JBA20M

Las losetas de caucho reciclado son fabricadas conforme a la normativa Europea EN1177. Son adecuadas para su uso en multitud de espacios donde queremos ofrecer pavimentos seguros y a la vez atractivos como: parques infantiles, patios escolares, guarderías, centros deportivos, zonas de recreo, parques temáticos, campos de golf, piscinas municipales... tanto para aplicaciones de interior como de exterior. Las losetas se instalan de forma rápida y sencilla, normalmente sobre una base dura de hormigón o asfalto, y no necesitan ningún tipo de mantenimiento adicional.

Opcional: Disponibles en distintos colores y espesores.

Les dalles de caoutchouc recyclé sont fabriqués conformément à la réglementation européenne EN1177. Ils conviennent à une utilisation dans divers espaces où l'on souhaite installer un revêtement à la fois sûr et esthétique, tels que les parcs pour enfants, les cours d'école, les garderies, les centres sportifs, les zones de loisirs, les parcs à thème, les terrains de golf, les piscines municipales, et ce tant pour l'intérieur que pour l'extérieur. Les dalles sont simples et rapides à installer, généralement sur une base dure de goudron ou de béton, et ne nécessitent aucun entretien supplémentaire.

En option : Disponibles en plusieurs couleurs et épaisseurs.

Recycled rubber tiles are manufactured according to European standard EN1177. They are suitable for use in many different spaces where it is necessary to provide safe, yet attractive surfaces, such as children's playgrounds, school yards, daycare centres, sport centres, recreational areas, theme parks, golf courses, public swimming pools, etc. Apt for both indoor and outdoor use. The tiles are installed quickly and easily, normally on top of a hard concrete or asphalt base, and they require no additional maintenance.

Optional: Available in different colours and thicknesses.

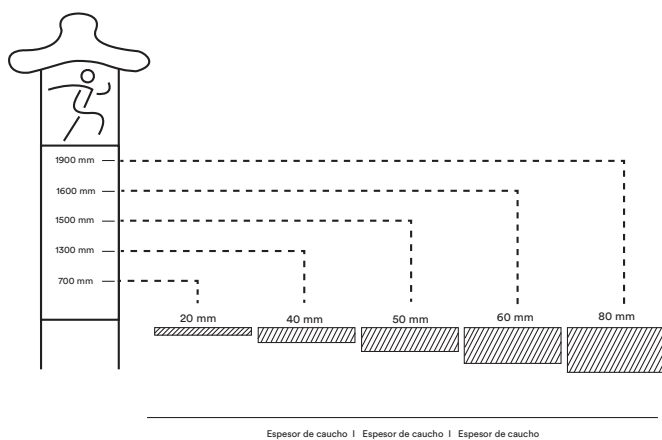

H.I.C. (Head Injury Criterion), és la mesura de absorció de la altura segun la norma europea EN-177.

H.I.C. (Head Injury Criterion), hauteur de chute absorbable suivant la norme EN 177

H.I.C. (Head Injury Criterion) is the measure of height fall absorption according to EN-177.

CREACIÓN Y DISEÑO DE ESPACIOS URBANOS

Benito3dplan es una completísima y potente aplicación especializada en la creación y diseño de espacios urbanos. Te permite realizar el diseño de parques con áreas completamente personalizadas e incluso añadir más de un área en el mismo proyecto, de forma cómoda y eficaz.

La interfaz gráfica de los diseños creados por Benito3dplan es de lo más realista, ya que se apoya en un potente motor de renderizado que ofrece gráficos en tres dimensiones, para que los usuarios podamos hacernos una idea mucho más fiel y precisa de cómo lucirá nuestro proyecto .

Aplicación gratuita

Resultados espectaculares en pocos minutos
Agiliza el proceso de diseño y oferta
No requiere experiencia ni conocimientos en 3D

Multiplataforma PC, MAC, IPAD, IPHONE

Planifica tu parque con todos nuestros productos y las distintas combinaciones de juegos infantiles, mobiliario urbano y alumbrado público, hasta dar con el resultado perfecto. Prueba tantos diseños como quieras y elabora una lista de los productos proyectados.

CRÉATION ET DESIGN D'ESPACES URBAINS

Benito3dplan est une puissante et complète application spécialisée dans la création et le design d'espaces urbains. Elle vous permet de réaliser des designs de parcs avec des surfaces totalement personnalisées et d'ajouter plus d'une surface dans le même projet, de façon commode et efficace.

L'interface graphique des designs créés par Benito3dplan est des plus réalistes. Elle s'appuie sur un puissant moteur de rendu en trois dimensions, pour que les utilisateurs puissent se faire une idée beaucoup plus fidèle et précise du résultat final de leur projet.

Application gratuite

Résultats spectaculaires en quelques minutes

Facilite le processus de design et offre
Pas besoin d'expérience ni connaissances en 3D

Multiplateforme PC, MAC, IPAD

Organisez votre parc avec nos produits et les différentes combinaisons de jeux pour enfants, mobilier urbain et éclairage public, jusqu'à obtenir le résultat escompté.

Essayez autant de designs que vous souhaitez et élaborer une liste des produits insérés.

CREATE AND DESIGN URBAN SPACES

Benito3dplan is a comprehensive and powerful application to create and design public urban spaces. Now it is possible to efficiently create custom-made parks with even more than one area for the very same project.

The graphic interface of these sketches created by Benito3dplan is ultra realistic as it is made with a powerful 3D rendering engine which allows any user to have a very specific idea of how the final project layout will look like.

Free App

Spectacular results in just a few minutes.

Design and quotation processes are now easier

No experience or 3D knowledge required

Cross-platform: PC, MAC, IPAD

Plan your park by placing our products and try combining them with any of the playground, furniture and street lighting ranges until achieving the perfect result.

Try as many sketches as you like and make a project list which can be saved onto your profile. You need to sign up to access the app. Start designing a new project or edit / copy any other made by you or one pre-designed that you will already find within the app. When you have finished your presentation, save it, print it or send it by email.

La mejora y evolución constante de nuestros productos, puede provocar algunas modificaciones en las especificaciones técnicas y características de los mismos. Las características técnicas del presente catálogo tienen carácter vinculante salvo error u omisión. Los datos técnicos y normativas facilitados están basados en los conocimientos adquiridos y representan nuestra mejor experiencia para documentar al constructor sobre la aplicación de nuestros productos, pero no podemos responsabilizarnos de su mal uso, inadecuada ubicación e instalación, o falta de respeto a las Normas UNE EN 124, UNE EN 1176 y otras.

L'amélioration et l'évolution constante de nos produits peut engendrer certaines modifications dans les spécifications techniques et les caractéristiques de ces derniers. Les caractéristiques techniques du présent catalogue sont conformes sauf erreur ou omission. Les renseignements techniques et les normes fournis sont basés sur les connaissances acquises et représentent notre meilleure expérience pour informer le constructeur sur l'application de nos produits mais nous ne pouvons pas nous responsabiliser du mauvais usage, de l'emplacement ou de l'installation inappropriés ou du non-respect des normes UNE EN124, UNE EN 1176 entre autres.

The ongoing improvement of BENITO URBAN products can cause some modifications in its technical specifications and characteristics. The technical characteristics of this catalogue are binding except mistake or omission. Detailed technical data and rules are based on the acquired knowledge and represent our best experience to document the building company about our products application. However, BENITO URBAN cannot take responsibility of its wrong use, inappropriate location or installation, or non-respect towards European Standards EN 124, EN 1176 and others.

Cuidemos el medio ambiente. El contenido del presente catálogo está protegido en su totalidad por derechos de autor y copyright, quedando prohibida la reproducción total o parcial de las imágenes, textos, ilustraciones y conceptos gráficos sin la autorización de BENITO URBAN. Document non contractuel, BENITO URBAN se réserve le droit de modifier les caractéristiques sans préavis. Préservons l'environnement. Le contenu de ce document est protégé dans sa totalité par des droits d'auteur et copyright. Toute reproduction totale ou partielle des images, textes, illustrations et concepts graphiques est interdite sans l'autorisation de BENITO URBAN.

We respect the environment. The contents of this catalog are protected in their entirety by copyright and intellectual property rights. Reproduction, either full or partial, of the photos, text, illustrations and graphic concepts contained here is prohibited without authorization from BENITO URBAN.
